Networking History: First Content Transmitted

- First Morse Code message:
    - "What hath God wrought?"
- First phone call by Alexander Graham Bell:
    - "Mr. Watson -- come here -- I want to see you."
- First content transmitted over the Internet?
    - "LO"
    - Intention was to send "LOGIN" …
    - … but the system crashed.
    - Sent by UCLA student programmer Charley Kline, at 10:30 pm, on October 29, 1969 who worked for Prof. Len Kleinrock

Global IP Traffic (Petabyte/month)
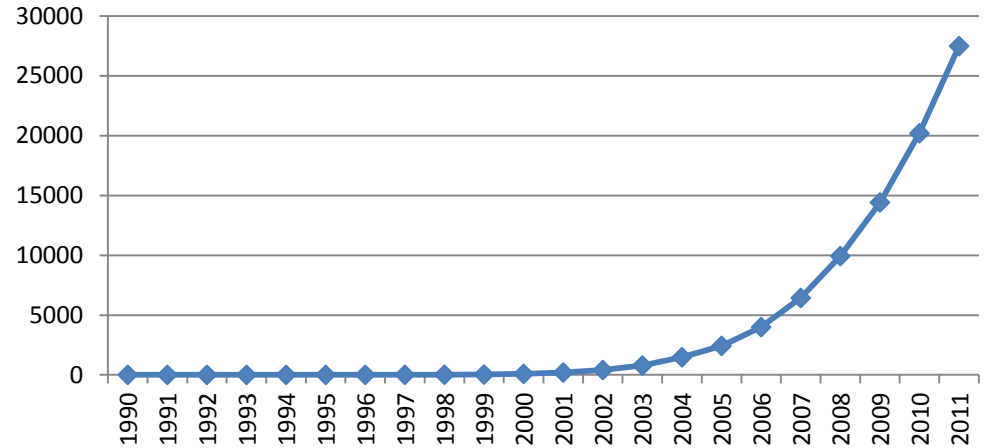

Source: Wikipedia

All books, articles, essays, songs, images, movies, videos, TV shows and Web pages ever made digitized and compressed corresponds to 50 Petabyte.

Source: New York Times

In 2016, the gigabyte equivalent of all movies ever made will cross the global Internet every 3 minutes.

Speakers

- ## Software-Defined Networks
  Anees Shaikh

  Senior Architect

  Systems Networking, IBM

- ## Named Data Networking
  Patrick Crowley

  Associate Professor

  Computer Science and Engineering

  Washington University

Bell Labs
Alcatel·Lucent
