Lakshmi Subramanian
NYU CS/Courant Institute

- Research interests: Networked Systems, Computing for Development, Data Science

- Research vision: Design, implement, deploy and evaluate large-scale computing systems to address important societal problems

- Key recent results:
  - Fingerprinting physical objects (Startup: Entrupy)
  - Long-distance Wifi and rural connectivity (Large-scale telemedicine network in India, led to successful startup)
  - Web/mobile stack for enhancing access under limited connectivity (deployed in Kenya, Ghana, India)
  - Fine-grained Dengue surveillance (deployed in Pakistan)
  - Food distribution networks and Commodity Exchanges (Ghana, Ethiopia)
