Research goal:

Improve **security & privacy** properties of existing and emerging technologies.

Analyze existing systems.
e.g.: web tracking,
automobiles, QR codes.

Build new systems.
e.g.: web, OS, smartphones,
user interface toolkits.

Understand mental models.
e.g.: smartphone permissions,
Snapchat, journalists.

Anticipate future technologies.
e.g.: telerobotics, wearables,
augmented reality.
